SUMMARY

Third-year Software Engineering student at Universiti Kuala Lumpur Malaysian Institute of Information Technology (UniKL MIIT) with strong foundations in full-stack web development, software design, database management, and problem-solving. Experienced in developing software projects using modern technologies and applying software engineering principles in practical environments. Possess strong communication, teamwork, adaptability, and time management skills. Seeking an internship opportunity starting 3rd August 2026 until 4th December 2026 in the software engineering industry to further enhance technical expertise and contribute to innovative software development projects.

WORK EXPERIENCE

QA/QC Internship, Ejen2U International Sdn. Bhd.

Jan 2024 - May 2024

- Performed manual and automated software testing for web applications to identify bugs, usability issues, and system defects.
- Developed and maintained automated test scripts using Robot Framework to improve testing efficiency and software reliability.
- Collaborated with software developers to analyze root causes of defects and recommend effective solutions.
- Executed functional testing, regression testing, and user acceptance testing (UAT) to ensure software quality and performance.
- Documented test cases, test results, and defect reports to support debugging and continuous improvement processes.
- Participated in team discussions and provided feedback on application functionality, user experience, and system performance.

EDUCATION

Bachelor Of Information Technology (Hons) In Software Engineering

University of Kuala Lumpur Malaysian Institute Of Information Technology

October 2024 - Present

- CGPA : 3.80
- Expected Graduation: 2027
- Received Dean List Award for all semester

Diploma in Software Engineering (Software Testing)

German-Malaysian Institute

July 2021 - July 2024

- CGPA : 3.41

Sijil Pelajaran Malaysia (SPM)

SMK Agama Arau, Perlis

2020

- Result : 4A,4B,2C,1D

SKILLS

Programming Languages	Frameworks & Tools	Database	Software Testing
• Java • JavaScript • Python • CSS • PHP • C#	• React.js • Node.js • Express.js • .NET • GitHub • Robot Framework • Selenium • JMeter	• MySQL • MongoDB	• Manual Testing • Automation Testing • Regression Testing • Functional Testing • User Acceptance Testing (UAT)

PROJECTS

Kindergarten Management & Monitoring System (KMMS)

- Developed a full-stack Kindergarten Management & Monitoring System using the MERN Stack.
- Implemented role-based authentication and authorization for Admin, Teacher, and Parent users.
- Built modules including student management, attendance tracking, announcements, activities, teacher management and many more.
- Designed RESTful APIs and integrated MongoDB database for efficient data handling.
- Applied responsive UI/UX principles to improve usability across different devices.
- Implemented CRUD operations, dashboard analytics, and secure user authentication using JWT.

GMi Chäft – Campus Marketplace Platform

- Designed and implemented responsive UI components with a focus on performance, usability and maintainability
- Built a seller analytics dashboard to track transactions, listings and user activity using structured data handling
- Integrated payment gateway solutions (ToyyibPay) for secure, cashless transaction processing

ADDITIONAL INFORMATION

- **Languages:** Malay, English.
- **Certifications:** Google Project Management, PECB Cybersecurity Foundation, CISCO CCNA Routing and Switching.
- **Leadership:** Project Manager - MPU2412 Co-Curricular Activities & Community Services (5 September 2022)
